

# BOOK YOUR INSPECTION NOW. AVOID DAMAGE LATER ON.

**Are you involved in the handling of abrasive raw materials such as sugar, carbon black, fibre-reinforced plastics or minerals?  
If so, when did you last have the condition of your pipelines and material handling components checked?**

Was it quite some time ago? No problem – we offer a regular inspection service to ensure trouble-free operation and avoid unscheduled repairs, downtimes and malfunctions.

Your benefits at a glance:

## EARLY DETECTION OF WEAK POINTS

- Identification of signs of wear in installed parts
- Timely replacement and repair of damaged or worn parts
- Scheduled replacement activities during shutdown times
- Reduction of unexpected breakdowns and downtimes

## RELIABLE MATERIAL HANDLING CHARACTERISTICS

- Stable conveying with no pipeline blockages
- Gentle conveying with reduced formation of fine particulates and minimal pellet destruction
- Balanced performance in terms of throughput and product protection

## LONGER SERVICE LIFE

- Preventive maintenance recommendations extend service life of machines and assemblies

## REDUCED OPERATING COSTS

- Parameter checking and process fine-tuning save money and resources
