

PRESS RELEASE

Changes to the Management Board of Zeppelin Plant Engineering

Friedrichshafen, October 12, 2021. Alexander Wassermann, Chairman of the Management Board of Zeppelin Systems GmbH, is leaving the company on October 31, 2021 at his own request and for personal reasons. The search for a successor has already begun. As of November 1, 2021, Rochus Hofmann, long-time Managing Director of Zeppelin Systems GmbH, will take over the provisional management of the Plant Engineering strategic business unit (SBU).

Alexander Wassermann took over as Head of the Plant Engineering SBU and chairman of the Management Board of Zeppelin Systems GmbH on July 1, 2019. The Zeppelin Group regrets the departure of this qualified engineer. Despite a challenging market situation and the global coronavirus pandemic, Alexander Wassermann successfully completed numerous international projects. Zeppelin respectfully wishes Alexander Wassermann all the best for his future career and personal life and expresses its gratitude for the work he has done. Until his successor takes over, Rochus Hofmann will assume provisional management of the Plant Engineering SBU from November 1, 2021. In his position as Managing Director of Zeppelin Systems GmbH, he has worked for the company for many years now.

About Zeppelin Systems

Zeppelin Systems specializes in constructing plants for the handling of high-grade bulk materials. With over 70 years of experience in the individual process steps and extensive expertise in handling various raw materials, Zeppelin Systems offers reliable complete solutions. From system planning to implementation, the company supports its customers worldwide at 22 locations, providing all services from a single source. Innovative process concepts are just as important as smart automation solutions and comprehensive service that covers the entire lifecycle of a system.

Each Zeppelin system meets the individual requirements of its customers, who come from industries such as plastics, chemicals, rubber and tires, as well as food. With the world's largest Association of Technical Centers for Bulk Materials, Zeppelin allows its customers to review and optimize system design on an industrial scale. In addition, Zeppelin Systems develops and manufactures its own components for the key functions of the plants, which are also used in third-party plants.
