

drive, propulsion, traction & energy systems

ENGINES, SYSTEMS, SALES AND SERVICE, YOU CAN COUNT ON.

100%

We are your partner when it comes to reliable drive, propulsion, traction and energy systems.

You can count on us: 24/7 – worldwide.

- Leading manufacturers in the construction, agriculture, forestry, logistics, recycling and processing industries count on Zeppelin Power Systems to drive their machines and vehicles.
- Seagoing and inland waterway ships, mega yachts and workboats run on our powerful Caterpillar Cat, MaK and EMD engines.
- For 60 years, our engines and systems have been used worldwide for petroleum and natural gas production as well as in the offshore sector.
- Rail vehicles worldwide are equipped with Caterpillar engines from Zeppelin Power Systems.
- Industries in the private and municipal sector choose our reliable energy systems for generating heat and power.

You can count on us.

Zeppelin Power Systems is the official partner of Caterpillar for Cat and MaK engines and a leading provider of drive, propulsion, traction and energy systems. It is a legal entity of the Zeppelin group with over 7,800 employees and a turnover of over 2.3 bn euros and has been partnering with Caterpillar for more than 60 years.

With about 800 employees, Zeppelin Power Systems offers their customers individual, highly efficient system solutions with comprehensive services for industrial and marine applications, the oil and gas industry, rail vehicles and power generation.

CAT®

Industrial applications

Leading manufacturers in the construction, agriculture, forestry, logistics, recycling and processing industries count on Zeppelin Power Systems to drive their machines and vehicles. Whether special applications, stationary or off-road, we deliver mobile and stationary power systems for original equipment manufacturers (OEM) and end customers. We customize the systems individually to the customer's requirements and deliver the industrial engines as open aggregates or container solutions, or even complete packages including transmission, container, frame and further equipment.

Marine applications

Seagoing and inland waterway ships, mega yachts and workboats – Zeppelin Power Systems is your partner for the sales, engineering and service of powerful Caterpillar Cat, MaK and EMD engines. We offer diesel, gas and dual-fuel engines for main and auxiliary propulsion, emergency generators, propellers and complete propulsion units and systems. Diesel-mechanical, diesel-electric or gas-electric propulsion systems or hybrid solutions – we deliver individual solutions, all from one source and customized to your application.

Oil & gas industry

For 60 years, our engines and systems have been used worldwide for petroleum and natural gas production as well as in the offshore sector. High performance and outstanding reliability for drilling and production, gas compression and well service – Zeppelin Power Systems is your partner for the sales and service of Cat and MaK engines ranging from 31 kW to 16,800 kW.

Rail vehicles

Traction for locomotives or rail vehicles, new constructions or re-motorisation – the right engine for every application. A broad portfolio of Caterpillar engines plus our specific constructive measures will help you to extend uptime, reduce oil and fuel consumption, lengthen maintenance intervals and simplify maintenance work. To date we have successfully installed more than 4,500 Caterpillar diesel engines in locomotives and rail applications around the world.

Power generation

Zeppelin Power Systems has delivered power units for power production with gas and diesel engines for over 30 years. As a general contractor, we create complete cogeneration plants for the combined production of power, heat, cold and process steam, as well as emergency power and island mode systems with diesel engines. We supply and service mobile and stationary diesel-powered power generators and systems for uninterrupted power supply (UPS). Our range of services includes, among others, project engineering, implementation engineering, power generator delivery and plant construction, as well as maintenance, repair and supply of spare parts.

Premium Pre-owned engines & aggregates

Zeppelin Power Systems operates a company-owned site in Bremen, Germany, for pre-owned equipment. We overhaul engines and power units to a professional standard in our modern workshops. In addition to a professionally correct general overhaul, we perform a quality inspection and upgrade the systems for reuse. Zeppelin Premium Pre-owned means professionally overhauled, upgraded and certified engines and generator sets including various warranty options. After the general overhaul, all engines and generator sets are carefully tested. The final test is performed according to Caterpillar specifications. You will receive a top-of-the line product with improved functions and equipped, if required, with options for your special application.
